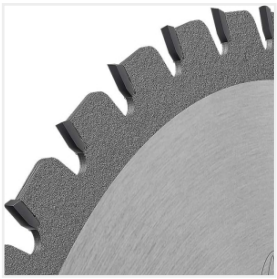
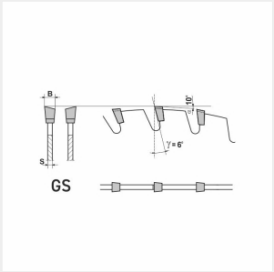
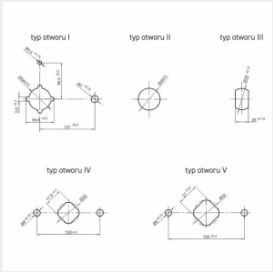
PS710

Saw blades with sintered carbide tips for meat cutting

New index







Features - benefits

- saw bodies made of food contact stainless steel with anticorrosive properties
- saw blades with GS tooth geometry - alternating teeth
- discs certified in food safety establishment by NIZP PZH - PB
- possibility to produce discs of other dimensions and regeneration of discs by sharpening or partial regeneration (exchange of HM tips and sharpening)

Application

- cutting swine, in particular hogs and sows, quartering swine halves, separating patches from hindquarters
- halving of swine in order to rationally dissect the dressed animal
- cutting of large-sized swine, beef, veal, mutton, goat, etc., including the process of halving and quartering dressed animals
- cutting up of venison
