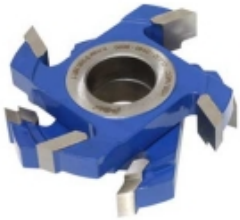
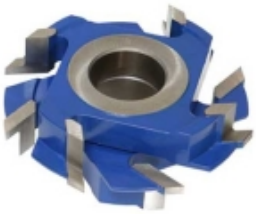
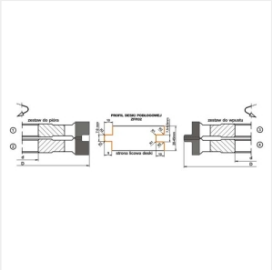
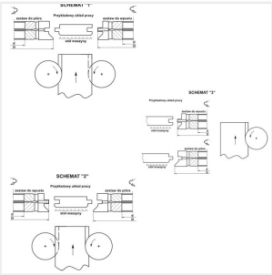
CL530
ZFP.02

Flooring shaper cutter sets (tongue-groove)









Features - benefits

- cutters with soldered HSS tips (high speed steel of high quality)
- wide range of sizes (diameter/blade width) enables to choose proper tool depending on work and machine type
- adjusted to work with cutters CL560 ? for log imitation
- especially recommended for processing of soft and medium hard green wood
- offer includes cutters made to order according to technical drawing or model piece or customer?s profile
- wide range of after-sales services: sharpening, bore adjustment and repair

Application

- longitudinal milling of panelling board
- used for processing of wood i.e.: pine, spruce, fir, birch
- range of processed material thickness: 28 - 45 mm
- used mainly in sawmill industry and other wood production factories
- cutters used on multi-head planers and bottom spindle milling machines with mechanical feed
- standard cutters are produced for double sided machines to schema 1 - if cutters should be used on single spindle machines please write it in the order
