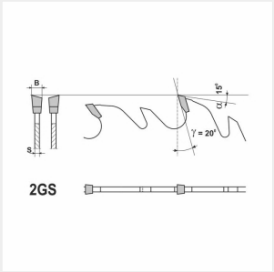
PS134 Saw blades MULTIX PRO Twin (6n) for raw wood ripping on single and twin multi rip saws



Features - benefits

- specially designed teeth construction with ?the tooth between? have a significant impact on improving cutting conditions and protects the? cutting tooth with carbide tip (HM) e.g. during woodworking of lower quality wood
- the new heat treatment of the disc technology significantly increases rigidity of the saw blade during woodworking at high loads
- application of the new type of high impact strength carbide tip allows to efficiently exploit saw blades, both during summer and winter
- aggresive geometry of sintered carbide (2GS) makes the saw blades perfectly cope with soft and hard raw wood cutting, even in the toughest woodworking conditions on multi rip saws
- specially designed configuration of 4 HM wiper slots protects the disk as well as perfectly cleans and removes cut output (including chips, juice and resins)
- 4 driving keyways allow to properly put the blade on the shaft with a better weight distribution throughout the cutting unit

Application

- specialistic MULTIX PRO Twin saw blades dedicated to woodworking in hard conditions
- woodworking on multi rip saws in a set - single or twin shaft multi rip saws
- soft and hard raw wood ripping
- wide range of woodworking - possibility of ripping of wood with more knots, not stripped, frozen, full of sand, and also with other different inclusions
- good chip removal positively affetcs woodworking and and improves the blade life
