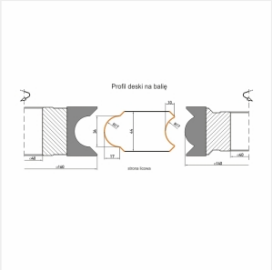
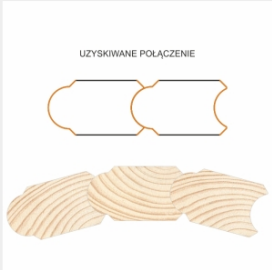
Set of cutters for a bath barrel, hot tub and garden sauna

New





Features - benefits

- milling cutters with brazed HSS inserts made of high-quality high speed steel
- set consists of 1 pc. milling cutter 160x40x42-48 Z4 HSS for milling of a convex part and 1 pc. 140x40x42-48 Z4 HSS cutter for milling of a concave part
- a wide range of typical dimensions (diameter / width of HSS inserts) allows selection of an appropriate tool for a given machining and type of machine
- preferably recommended for milling softwood
- to order we manufacture atypical cutters - based on a drawing of a cutter or milled part and according to a profile delivered by a customer
- a wide range of after-sales services, servicing of tools in the field of sharpening, reworking of a hole and regeneration of a tool

Application

- longitudinal milling of boards for bath barrels, hot tubs and garden saunas
- for processing, among others, such coniferous wood species as: pine, cedar, larch, spruce, fir, etc.
- thickness range of the processed material: 42 - 48 mm
- most often used in plants producing wooden elements
- used on multi-sided planers with mechanical feed and on low-spindle milling machines

INFO:
The set consists of 1 pc. of a 160x40x42-48 Z4 HSS cutter for milling the convex part and 1 pc. of a 140x40x42-48 Z4 HSS cutter for milling the concave part.

We also produce cutters with other dimensions and a different number of teeth, which are subject to individual valuation
Cutting cutters can be made with a hole diameter: 25, 30, 35, 40, 50mm

When ordering, please provide:
set designation, e.g.: ZBS
outer diameter, e.g.: D=160mm, D=140mm
hole diameter e.g.: d=30mm
blade material: HSS
