

CL530
ZFP.01

Flooring shaper cutter sets (tongue-groove)

Features - benefits

- » cutters with soldered HSS tips (high speed steel of high quality)
- » wide range of sizes (diameter/blade width) enables to choose proper tool depending on work and machine type
- » adjusted to work with cutters CL560 ? for log imitation
- » especially recommended for processing of soft and medium hard green wood
- » offer includes cutters made to order according to technical drawing or model piece or customer's profile
- » wide range of after-sales services: sharpening, bore adjustment and repair

Application

- » longitudinal milling of panelling board
- » used for processing of wood i.e.: pine, spruce, fir, birch
- » range of processed material thickness: 16 - 29 mm
- » used mainly in sawmill industry and other wood production factories
- » cutters used on multi-head planers and bottom spindle milling machines with mechanical feed
- » standard cutters are produced for double sided machines to schema 1 - if cutters should be used on single spindle machines please write it in the order
