

CL540
ZZF

Sets of chamfering and rounding cutters

Features - benefits

- » cutters with soldered HSS tips (high speed steel of high quality)
- » wide range of sizes (diameter/blade width) enables to choose proper tool depending on work and machine type
- » especially recommended for processing of soft and medium hard green wood
- » offer includes cutters made to order according to technical drawing or model piece or customer's profile
- » wide range of after-sales services: sharpening, bore adjustment and repair

Application

- » chamfering or rounding the edge of elements from raw wood
- » used for processing of wood i.e.: pine, spruce, fir, birch
- » range of processed material thickness given in the table below - adjustment with spacers
- » used mainly in sawmill industry and other wood production factories
- » cutters used on multi-head planers and bottom spindle milling machines with mechanical feed
- » standard cutters are produced for double sided machines to schema 1 - if cutters should be used on single spindle machines please write it in the order

INFO:

we also produce cutters with different size and teeth number, individually quoted
cutters can be produced with bore diameter: 25, 30, 35, 40, 50mm

Please mention in the order:
set description eg.: ZZF.01
outer diameter eg.: D=134mm
inner diameter eg.: d=40mm
edge material: HM or HSS
