

LJ051

Rebating cutterheads with spurs

Features - benefits

- » cutterhead made from light aluminum alloy
- » arrangement of HM tips at the angle to tool's axis enables to achieve very good surface, better chip removal and smoother tool's work
- » customer chooses type of HM knives (for wood, universal, for wood boards) according to material processed
- » equipped with set of HM insert knives
- » offer includes cutterheads made to order according to technical drawing or model piece

Application

- » milling of grooves and rebates with rectangular cross-section
- » used if high quality of socket side and edge surface is required
- » used on bottom spindle milling machines, single- and double-ended tenoning machines, multi-head planers with mechanical feed
