LJ090 Spiral jointing cutterheads

Features - benefits

- cutterhead made from light aluminum alloy
- equipped with set of HM insert knives
- customer chooses type of HM knives (for wood, universal, for wood boards) according to material processed
- special spiral arrangement of HM tips
- arrangement of HM tips decreases cutting resistance und enables to achieve good quality of processed surface
- offer includes cutterheads made to order according to technical drawing or model piece

Application

- milling of curved planes and surfaces
- used for pre planing and work with small machining allowances
- cutters used in bottom spindle milling machines, tracing and pattern machines, multi-head planers with mechanical feed
- to order: we offer bearing for cutterheads that enables to mill along the pattern
