

LJ130

Cutterheads for serrated back knives

Features - benefits

- » cutterhead made from high quality tool steel
- » grooves in the cutterhead protect knives from uncontrolled slipping out
- » grooves in the cutterhead and knife facilitate mounting and dismounting
- » wide range of sizes enables to choose proper tool depending on work and machine type
- » profiled HSS knives made to order according to technical drawing or wooden model piece
- » offer includes cutterheads with different diameter, width and teeth number

Application

- » profile or straight milling of raw wood
- » cutters used on bottom spindle milling machines and multi-head planers with mechanical feed
- » max. profile depth (Gp) - 3x knife thickness
