

PS660

Saw blades for raw wood grooving

Features - benefits

- » use of high quality materials and sophisticated production technology guarantees high and repeated quality of saws offered by our factory
- » saw blades maintain appropriate rigidity while working, and feature long life
- » properly selected tip configuration enables obtaining optimal working quality of the ripped material
- » saw disc has special heat compensating grooves and is extremely warp resistant to warping under high temperature and heavy load
- » saw blades with greater diameter equipped with additional cooling grooves

Application

- » for soft and hard wood grooving
- » for edge rebating
- » used in cut-off machines and spindle moulder
