

FT915

Profiling router bits CNC PREMIUM with bottom bearing - for stile and rail furniture door

FT915-4112-0001

FT915-4112-0002

Features - benefits

- » open profiles improve quality of processed surface, enable use of greater feed values, reduce cutting resistance and facilitate chip removal thanks to bigger tooth space
- » high quality of sintered carbide significantly increases durability and tool life time ? more tool efficiency
- » precise grinding of HM knives enables to achieve high tip smoothness (low roughness) what influences the tool life time and is evidence of high quality of sintered carbide used
- » easy and clear packing way ? tools can be exhibited in glass-cases or on rack

Application

- » milling of stiles from soft and hard raw wood and wood-based materials (chipboard, MDF, HDF, OSB etc.)
- » used in production of furniture and doors, where the elements cannot be milled in a conventional way
- » router bits with bottom bearing enable to mill according to the pattern placed under the processed material
- » used on top spindle milling machines
- » hobbing and drilling
- » raw wood and wood-based materials processing
- » used on top spindle milling machines
- » fixing the cutters in the clamps: possibility of using reducing sleeves on the shank, fix min. 2/3 of the height of the shank in the handle of the cutter
