

PS312

Saw blades LL CUT speedline GA15 for cutting wood derived materials

Features - benefits

- » SUPER HARD carbide tips (NANOGRAIN) with hardness of 2.160 HV10 ensure longer life time - higher number of running meter of board cut till sharpening
- » new shape of HM-tip influences cutting parameters in a positive way, i.e. smoother and faster chip removal cutting space
- » dynamically balanced disc eliminates vibrations during cutting - stable cutting process and higher quality of cut surface
- » precisely executed saw disc with new silencing slots limits noise level and ensures tools longevity - new stable and silenced saw disc
- » designed compensation slots increase warp resistance due to high temperature and load
- » high smoothness of HM-tips guarantees longer tool life till sharpening - sharpening process performed on CNC sharpening machines with specially chosen grinding wheel and sharpening parameters
- » series with teeth geometry GA 15 (TR-F triple-chip + flat)

Application

- » new series of saw blades LL CUT speedline is dedicated to cutting of wood-based materials such as: MDF, HDF, LDF, MFP, fiberboard, homogenous materials
- » especially recommended for cutting furniture boards with high efficiency (number of meters cut/ number of sharpenings) and high quality of cut edges
- » cutting on horizontal sizing machines up to the material thickness: 25mm
- » saws can be used with scoring saws
