

PS495

Saw blades ALUEX -Cleaning PVC- for angle deburring machines for PVC windows

Features - benefits

specially designed type and teeth geometry allow for high efficiency and proper quality of processed surfaced
 additional longer HM tips enable to mill PVC corners
 specially selected HM tips ensure tool's longevity
 disc made from thermally improved high quality tool steel guarantees stable cutting process
 offer includes saw blades with flange produced to customer's order according to technical drawing or information about working parameters and material sizes

Application

special saw blade for milling / chamfering the outside of the corner saw blades has got a task to deburr welded PVC profiles
 dedicated to special machines for the production of PVC window and door industry often occur as a left and right saw blade due to chamfering and rotation direction - attention: before ordering please check the technical documentation of your machine (elumatec, EMMEGI, ROTOX, FIMTEC, PREZ-MET, PRESTA EISELE, URBAN, WEGOMA, etc.)
 in order to obtain the best possible surfaces, it is necessary to apply the correct pressure (clamping) to the material during cutting - the workpiece/piece should be immobilised in clamping, e.g. pneumatic, hydraulic, mechanical, etc.
