

PS496

Saw blades ALUEX -Chamfering PVC- for chamfering glazing beads

Features - benefits

special saw blades with special teeth geometry and rake angle +5°
 chamfering with HM saw blades guarantees longer tool life time - higher number of elements cut till sharpening
 properly executed disc and specially selected sintered carbide type guarantee high quality of chamfered surfaced
 wide opportunities for sintered carbide sharpening - enables to solve problems with cutting process and meet high quality requirements

Application

special saws designed for chamfering PVC glazing beads with rubber sealing
 saws coupled with main saws: PS415-0200-0008, PS415-0200-0006, PS415-0230-0001, PS415-0230-0002, PS415-0250-0009, PS415-0250-0006
 saw blades dedicated to cutting /chamfering in window and door industry
 in order to obtain the best possible surfaces, it is necessary to apply the correct pressure (clamping) to the material during cutting - the workpiece/piece should be immobilised in clamping, e.g. pneumatic, hydraulic, mechanical, etc.
