

BP100

## Hand hacksaw blades - type RAMa

## Features - benefits

- » made from high quality German tool steel - CARBON STEEL
- » teeth milled with special hobs what enables to achieve proper and optimally selected teeth geometry
- » wavy teeth setting (so called waving) allows for smooth cutting and protects from sticking in processed material
- » fully controlled induction hardening guarantees proper hardness and teeth flexibility what protects from teeth breaking

## Application

- » used for curved and straight cutting of ferroalloys, non-ferrous metals and plastics
- » single sided, narrow
- » proper tension of hacksaw blades ensures straight cutting
- » dedicated to hand frames
