

BM700

Long blade HSS - NPMd-P

Features - benefits

- » made from high speed steel HSS-DMo5 (SW7M)
- » proper heat treatment enables to achieve high hardness and appropriate material structure
- » additional tempering of grip protects from breaking while mounting and cutting

Application

- » used for cutting of soft steel, hard plastics and non-ferrous metals
- » especially recommended for straight cutting
- » arches with big radius
