

WB010

Drill bits for masonry and concrete /short/

Features - benefits

- » drill point made from sintered carbide
- » precisely concentrically soldered HM tip ensures longer tool life time and work safety
- » optimal point angle with 130 degrees facilitate drilling in the material
- » smooth chip removal due to specially designed spiral construction that allows for stable drilling and boring

Application

- » drilling of short holes for eg. mounting pins
- » ideal for drilling in masonry, concrete and natural stone
- » used in traditional rotary and hammer drills
- » cylindrical shank- KWPN
