

FT916

Dovetail router bits CNC PREMIUM for connections

Features - benefits

- » open profiles improve quality of processed surface, enable use of greater feed values, reduce cutting resistance and facilitate chip removal thanks to bigger tooth space
- » high quality of sintered carbide significantly increases durability and tool life time ? more tool efficiency
- » precise grinding of HM knives enables to achieve high tip smoothness (low roughness) what influences the tool life time and is evidence of high quality of sintered carbide used
- » easy and clear packing way ? tools can be exhibited in glass-cases or on rack

Application

- » router bits for connections made on the so-called DOVETAIL
- » for processing soft and hard wood and wood-based materials (chipboard, MDF, HDF, OSB etc.)
- » used in production of furniture, doors, stairs, where the elements cannot be milled in a conventional way
- » used on top spindle milling machines and CNC milling machines
- » fixing the cutters in the clamps: possibility of using reducing sleeves on the shank, fix min. 2/3 of the height of the shank in the handle of the cutter
