Band saws for cutting frozen and not frozen meat with or without bones

New

Features - benefits

- » band saw blades made of spring structural steel in contact with food with anticorrosive properties
- » bandsaws to HORS specification - hardened, sharpened, set, ground
- » manufactured with grinding method to extend blade life and to eliminate microcracks
- » bandsaw welding process is performed on highly specialized welding machines to ensure high quality and repeatability of the weld
- » possibility to manufacture band saw blades in different dimensions band saw blades with specially designed bucking teeth to facilitate the cutting process of fresh meat
- » possibility to produce band saw blades in other dimensions

Application

- » cutting pigs, hogs and sows, quartering pig halves, separating the rumps from the hind quarters
- » halving pork for rational cutting of dressed game
- » cutting larger pigs, beef, veal, mutton, goat, etc., including the process of halving and quartering game
- » cutting game, halving and quartering game
- » saws also used for cutting fish
