Band saws for cutting fresh meat

New

Features - benefits

- » band saw blades with specially designed inster tooth to facilitate the cutting process of fresh meat
- » belt saw blades made of food grade structural steel with anticorrosive properties
- » belt saw blades to HORS specification - hardened, sharpened, tempered, bifurcated, sanded
- » belt saw blades are ground, produced by grinding the blades, which prolongs blade life and eliminates microcracks
- » healing process of band saw blades is performed on highly specialized welding machines which ensures high quality and repeatability of welded seams
- » possibility to produce band saw blades in other dimensions

Application

- » cutting pigs, hogs and sows, quartering pork halves, separating the cuts from the hind quarters
- » haling pork
- » cutting beef, veal, mutton, goat, etc., including the process of halving and quartering game
- » cutting game, halving and quartering game
- » saws also used for cutting fish
