PS674 HM saw blades AKU 1 -WOOD / CHIPBOARD- series for cordless power tools

Features - benefits

- thin disc made of high quality, heat-treated steel equals surface hardness and high tool stiffness
- low cutting resistances, thin kerf and lightness of the tool ensure lower cutting resistance, which facilitates tool penetration in the cut material
- sintered carbide used guarantees long life time and allows multiple sharpening
- the sharpening process carried out on numerically controlled CNC sharpening machines with preserving certain operating parameters of the grinding wheel, ensures extremely sharp edges of the tool

Application

- ripping and cross cutting of material up to 55mm thick
- saw blades ideal for mobile applications on the construction site
- fast, accurate and mobile cross cutting of wood and wood materials
- specially profiled shape of the tooth and blades (alternate top bevel teeth) allow to obtain very good surface quality of materials cut
- thin saw blades with reduced power consumption, dedicated to cordless power tools
- in order to obtain the best possible surface finish and with a view to a safe cutting process, it is necessary to apply the correct clamping pressure - the workpiece/piece should be fixed in a clamping fixture, e.g. a clamping bench or workbench
