

LS080

SPACE shank cutters with tungsten carbide blade - for nesting

New

Features - benefits

- » SPACE nesting shank cutter with a workpiece made of high-quality fine-grain carbide
- » 3-cutter design with 0-degree helix angle geometry
- » high edge quality on both sides of the workpiece
- » quick and easy chip ejection for high machining efficiency
- » unique solution for users expecting perfect edges after machining
- » very suitable for machining wood-based materials at high feed rates

Application

- » ideal for processing 18mm thick raw board or laminated furniture board up to 19mm thick
- » applied feed rate from 2 - 16 m/min - depending on the type of workpiece material and tool diameter
- » also great for working with plywood - in this situation, set the feed rate no faster than 6 m/min
- » used on high-performance CNC machining centers with mechanical feed and on milling plotters
