

LJ055

Adjustable grooving cutter head (steel)

New

Features - benefits

- » cutter head body made of high-quality tool steel, coated with a nickel layer
- » option to choose a different grade of HM (tungsten carbide) inserts - for wood, universal use, wood-based materials, and specific applications depending on the type of material to be machined
- » equipped with a complete set of spacers / shims (1 x 0.10 mm, 5 x 0.50 mm, 1 x 0.6 mm, 2 x 2.5 mm), TORX T15 key for securing scoring inserts, and 3.5 mm allen key for securing the HM cutting inserts
- » custom head manufacturing available upon request, based on a sample or drawing

Application

- » milling of keyways, rabbets, and rectangular tenons
- » equipped with a set of four-sided replaceable inserts and HM (carbide) cutters - for universal application
- » adjustable groove milling height in the range: from 8 mm to 15.5 mm
- » intended for applications requiring high-quality machining of side surfaces and slot edges
- » compatible with: bottom spindle moulders, single- and double-sided tenoners, and four-sided planers - with mechanical or manual feed
