

LJ085

Aluminium cutter head for 45-degree connections

New

Features - benefits

- » cutter head made of lightweight and durable aluminum alloy
- » for joining components with height ranging from 12 mm to 28 mm
- » replaceable HM inserts made of high-quality tungsten carbide
- » equipped with a set of HM replaceable inserts (40x25x2,0 Z1) with universal application
- » includes a 4,0 mm Allen key for securing the HM inserts with set screws
- » custom head manufacturing available upon request, based on a sample or drawing

Application

- » milling wood at a 45 degree angle
- » most commonly used for milling components joined at a 90 degree angle (corner joints)
- » also used for milling components joined lengthwise
- » designed for machining solid wood and wood-based materials
- » used in the production of frames, drawers, chests, boxes, packaging, etc.
- » suitable for use on spindle moulders and panel sizing machines, typically with manual feed
