

FT201

GOLD shank drill bits for hinges and hinge cups

New

Features - benefits

- » high-quality cemented carbide increases the durability and performance/lifespan of the tool
- » carbide blades are ground on high-performance, automated CNC grinding machines
- » the drill head is equipped with a pilot blade (point) as well as 2 cutting inserts and 2 scoring inserts made of cemented carbide, angled optimally
- » the body and shank are made cylindrically from high-strength tool steel
- » easy and clear packaging method - allows for tool display in showcases and on shelves

Application

- » effective drilling of holes for hinges and cups in laminated or laminated furniture boards and other wood-based materials
- » designed for use with screwdrivers and drill/drivers with cylindrical handles when installing hinges in furniture doors
- » drilling holes with a 35 mm drill at a speed of approximately 2500 RPM (clockwise rotation)
- » also used as an accessory in stationary drills with three-jaw chucks
- » designed for professional furniture assemblers and DIY enthusiasts for carpentry and home renovation work
