

LV422

Z2+2 compression solid carbide roughing cutters - for machining wood-based materials

New

Features - benefits

- » solid carbide end mills - body and cutting edge made from cemented carbide
- » cutters available in diameters of 8-16 mm, with varying overall lengths and cutting edge lengths
- » 2+2 cutting edges - 2 positive spirals and 2 negative spirals with a grooved cutting edge
- » the cutting edge can be coated with performance-enhancing coatings, significantly extending the tool's service life

Application

- » for cutting and milling in wood-based materials, solid wood, plastic and aluminium
- » the special blade geometry and spiral arrangement allow for easy chip evacuation and a smooth surface finish on the workpiece
- » used on high-performance CNC machining centres with mechanical feed
- » operating parameters for FURNITURE BOARDS: 18,000-24,000 RPM, feed rate 10-30 m/min
- » operating parameters for LAMINATES: 18,000-24,000 RPM, feed rate 10-30 m/min
