

PS050

Hannibal saw blade for raw wood ripping

Features - benefits

- » saw blades with teeth grouping (called 'hannibal') enable use of greater feed values
- » properly selected teeth geometry and number (teeth grouping 8x5z) enable optimal chip removing from cutting space
- » the saw disc has special heat and load compensating grooves

Application

- » saws designed for preliminary soft wet wood cutting
- » especially recommended for ripping (cutting wood along the grain) of logs with great cross-section
- » used in single or double blade circular sawmills
- » preliminary log processing in sawmill industry
