Gang saws stellited - to order

Features - benefits

- » saw body with hardness 45-49 HRC (depending on the type of steel) and hardness of the stellited blade 49-51 HRC
- » made of high quality tool steel (UDDEHOLM, German Steel), proven in sawmill cutting of soft and hard wood of various species
- » the advantage of the stellited saws is that foreign objects in raw material sawn to a thickness of 1 mm do not damage the teeth blades
- » laser cut blade, which ensures obtaining very high tooth pitch accuracy and significantly facilitates its sharpening
- » the saw body is subjected to a tension process that ensures proper saw rigidity during operation
- » the possibility of regeneration of gang saws
- » range of available dimensional parameters to perform - length: 700-1900mm, width: 140mm, 160mm, 180mm, thickness: 2.2mm, tooth pitch (t): 25mm, 30mm

Application

- » dedicated to cutting all types of raw wood
- » especially recommended for making the prisms from hard, sanded, exotic wood
- » recommended use of stellited saw blades: 5-7 hours of cutting + 12 hours of rest
- » saws are made according to customer orders (one or two rows system)
- » group teeth X and Z are intended for horizontal band saw machines
