

PS112

Saw blades MULTIX PRO Standard (2n) for soft and raw wood ripping for multi rip saws

Features - benefits

- » Professional Multix PRO Standard series are equipped with a hard disk which ensures high rigidity in difficult woodworking conditions which are characteristic for high performance multi rip saws
- » wiper slots properly located on the disc allow quick chip removal
- » application of the new type of high impact strength carbide tip allows to efficiently exploit saw blades, both during summer and winter
- » you can choose saw blade with a larger number (24) of the teeth which allows the processing of hard dry wood
- » 4 driving keyways allow to properly put the blade on the shaft with a better weight distribution throughout the cutting unit

Application

- » dedicated to dry wood, soft and hard raw wood ripping on single or twin shaft multi rip saws
- » MULTIX PRO Standard saw blades with 24 teeth can be used for dry soft and hard wood ripping
- » especially recommended to use on high class multi saws, properly prepared wood
- » one of conditions for proper work is appropriate chip removal
